

# RESCUE PROUD

Spruce up your summer style with a DIY “Rescue” tee & bandana combo!

By Rebekah Chotem

## WHAT YOU'LL NEED

- 100% cotton t-shirt or bandana (we recommend a lighter colour so that your transfer stands out!)
- Iron-on transfers (available through most craft stores or office supplies stores for around \$10)
- An iron
- And that’s it! Totally easy.

## HOW-TO:

1. Insert Iron-on paper into your printer, making sure it’s inserted the right way up.
2. Download and print this template onto the iron-on transfer sheet and allow to dry for a full five minutes before handling (though we know you’ll be itching to get your paws on it!)
3. Cut out your design leaving a narrow margin around the edge, but don't cut too close or it will be harder to peel away, and jeopardize the crisp edges of your design.
4. Set your iron to the highest cotton setting, and prepare a hard surface (not an ironing board as it’s too soft).
5. Position your design face down and apply firm pressure with the iron, while smoothly ironing over the template. This requires some arm muscle, so be prepared! And make sure to carefully follow the iron-on instructions. Be sure not to iron too long or you’ll discolour the edges of the transfer!
6. Peel away the template sheet and *voilà!* a stylish design for you or your deserving pup. ■
